

**Nerima City Safety Confirmation  
Board in a Disaster**

**無事です**

**(OK／平安／무사합니다)**

**If you do not need us to confirm your safety,  
please present this side and place it where it is visible from outside.**

# Two things we would like you to do **when a major earthquake strikes** (an earthquake with a seismic intensity of lower 5 or greater)

## One

If your family is safe and do not need help from the community, please leave the Safety Confirmation Board outside your door. (Display at least three days.)

## Two

Please walk around and check the houses in the neighborhood to see if the safety confirmation boards are displayed. Homes not displaying the safety confirmation boards will be prioritized for checking.

- The safety confirmation boards will be used to quickly spot those who are in need of help in the community to provide assistance in times of disaster. **When households not requiring assistance display “We are OK”, it allows the community to quickly identify households without a sign, meaning they might not be safe.**
- Please visit households not displaying the board to see if they are safe.
